

Filler Units & Pressure Vessels

We at **Campion Mechanical & Electrical Engineering** manufacture single pump filler units. Our stainless steel tanks are capable of holding anything up to 25ltrs. Our units come fitted with a high/low pressure switch for control of the boiler. The pumps we use are bronze impeller pumps.

Our 2 pump filler unit consists of:

- 2 PN16 bronze impeller pumps.
- 150 litre Stainless Steel tank.
- High and Low pressure switches.
- Control panel with BMS connections (ie run trip, high and low)

All mounted on a Stainless Steel base plate.

We also stock a wide range of pressure vessels for hot and cold water which can cater for all needs.

- From 2 litres to 1000 litres.
- Stainless Steel Flanges.
- WRAS approved.
- Butyl Membranes.
- Suitable for temperatures up to 100 degrees centigrade.
- Working pressure up to 10 bar.
- Horizontal or vertical configurations.

Gortnahoe, Thurles, Co. Tipperary.
