

We at **Campion Mechanical & Electrical Engineering** stock a large range of domestic circulators for heating installations, boilers and underfloor heating systems.

- Wide range of pumps to choose from, with a choice of fixed or variable speed settings.
- Simplified cable entry pushfit connections.
- Light compact design.
- Low noise level

We stock a wide range of shower booster pumps.

- Positive and negative heads.
- Low noise level.
- Anti - vibration feet to reduce noise level further.

We assemble our own range of drinking water storage tanks complete with booster pump, such as the aqua box plus range shown above.

Ideal under the following situations:

- Low water pressure from public supply.
- Pressure drops during peak demand.
- Act as reservoir if public supply is off.

#### Benefits

- Constant Pressure Pumping system.
- Variable speed technology.
- Energy efficient.
- Very quiet.
- Various sizes for different applications.

#### Solutions

We at **Campion Mechanical & Electrical Engineering** offer a free design and supply service for any type of application you are working on.

#### Examples:

- Pumps for GAA Clubrooms.
- A small hotel or large B & B
- Pumps for school or large office.

We will pick the correct pump for the job, taking worry away from you. To discuss your project further simply give us a call.

#### Expansion Vessels & Hot water storage

Campion's range includes expansion vessels for central heating and potable water uses. Our range is from 4 - 600 litre vessels.

Our range of stainless steel insulated cylinders and buffer tanks are extremely efficient and meet the high standards required.

- 10 bar working pressure.
- Rapid recovery coils.
- Provision for immersion heaters.
- High grade insulation.
- Suitable for vented & unvented systems.
