

Service and Maintenance

Campion Mechanical & Electrical Engineering can offer you a complete range of service and maintenance packages to suit both your business and your budget.

Hotels & Office Buildings:

We can offer your hotel or building a complete service programme for all your pumps, including circulating pumps, booster stations, filler units and also storm and sewerage stations. We carry a large stock of spare pumps and parts and can service all makes of equipment.

Sewerage & Drainage Pumping Stations:

We have a special team who are highly trained to service your sewerage pumping stations. Complete with all the required Health & Safety lifting equipment, we can ensure your station stays running smoothly and efficiently well into the future, thus avoiding unnecessary call outs and blockages.

We also offer our contract customers an emergency response service 7 days a week for those unforeseen blockages or other problems.

Water Pumping Stations:

We can offer your group scheme, housing estate or any other location with water pumping equipment, a complete regular servicing programme. This will ensure your equipment will last longer and keep your consumers happy with constant pressure and as few water shutdown periods as possible. We can also monitor all your equipment remotely via our alarm system to further help prevent any problems.

Housing Estates:

Campion Mechanical & Electrical Engineering can run and maintain your housing estate pumping and treatment stations. Our trained caretaker will call in each week and ensure all equipment and chemicals are ok. We will handle all dealings with the local authorities and make sure the water leaving your station complies with all the regulations.
