

Sewage and Storm Waste Water

At **Campion Mechanical & Electrical Engineering** we offer a wide range of foul water pumping solutions that can cater for anything from the single house domestic unit right through to the most complex municipal requirement.

Campion Mechanical & Electrical Engineering can offer turn-key solutions for your pumping stations. Including;

- Pump station design.
- Pump installation.
- Supply of holding tanks.
- Control panel assembly.
- Monitoring equipment.
- Service and maintenance contracts

We stock and can install a wide variety of pumps to suit many different types of foul water pumping applications. Our engineers are trained to offer a reliable and trouble free installation and maintenance solution. For more details or to discuss your requirements please contact us.

Some Common Projects:

- Housing estate transfer stations.
Using Block free impeller technology.
- Industrial (Hotel, Office, Retail Parks).
Backed up by a 7 day emergency service.
- Local authority schemes.
Including upgrading from older type systems.
