

# Small Booster Sets

Here at **Campion Mechanical & Electrical Engineering** we stock a wide range of Booster sets for the not so demanding customer. There is a wide range of these smaller sets to choose from. Some of the most popular are as follows:

## FE1 Vessel Mounted Single Pump.

Flow Range: 0.5-3.0 Litre/sec

Pressure Range: 2.0-4.0 Bar

Control type: Electromechanical pressure switch.

This model is a simple and reliable method of delivering pressurised water.

These Units are pre-assembled and tested.

- Single fixed speed pump.
- Pressure control system with overload protection.
- Local electrical isolation.

## VE1 Vessel Mounted Single Variable Speed Pump.

Flow range: 0.5-3.0 Litres/sec

Pressure range: 2.0-4.0 Bar

Control Type: Mini Hydrovar

The VE pressure units are designed for installations where a twin pump system is not required or insufficient space is available.

- Single variable speed pump.
- Fuse protection with local isolation.
- Integrated adjustable pressure control.
- Low water cut-out.
- Motor thermistor protection.
- System pressure gauge.

## GTKS Basic Variable Speed Twin Pump Booster Sets.

Flow Range: 0.1-3.6 Litres/sec

Pressure Range: 2.0-5.0 Bar

Control Type: Teknospeed

Extremely quiet operation renders them ideal for prestigious residential installations.

- Twin tekno-speed pumps.
- Integrated adjustable pressure control.
- MCB Protection with local isolation.
- Low water cut-out contacts.
- System pressure gauge.

## VR2/3 Compact Twin/ Triple Variable Speed Booster Sets.

Flow Range Twin: 0.5-10.0 Litres/sec

Flow Range triple: 1.0-10.0 Litres/sec

Pressure Range: 2.0-6.0 Bar

Control type: Hydrovar

- Variable Speed pumps.
- Local electrical isolation and MCB protection.
- Duty Pump Changeover timer.
- Common alarm volt free contact.
- Pressure setpoint adjustment.
- Pumps easily removable for overhaul.
