Spencer Dock Developments - Dublin

Campion Mechanical & Electrical Engineering were awarded the main pump supplier contract for all surface pumps for both the commercial and residential aspects for this large development.

Mains Water Booster Pumps

The Manufacture of a special, large five pump variable speed booster system, designed to provide the client with a constant pressure system and also obtain low running costs by using the Hydrovar system complete with a Jockey pump for low flow conditions.

Circulating Pumps

We provided a wide range of energy efficient variable speed circulating pumps, using both the standard and sensorless Hydrovar variable speed drives. These circulating pumps were mostly all duty/standby and the control of the duties handled by the Hydrovar automatically.

Fire Hose Booster Set's

A complete range of fixed speed automatic fire fighting booster sets compete with water storage tanks.

Pressurisation Units & Expansion Vessels

A complete range of automatic twin pump auto pressurisation units and suitably sized expansion vessels.
