

# Water Pumping Solutions

**Campion Mechanical & Electrical Engineering** have carried out a vast amount of work on behalf of various county councils and local group water schemes all over Ireland.

**Campion Mechanical & Electrical Engineering** can provide anything from a simple single pump installation up to the complete project management of your full turn key requirements including pump house, reservoir and water treatment facilities.

We have a range of specially converted vehicles for the installation of large borehole pump installations 6", 8" etc...

Below are some of the services we can offer:

- Arrangement of Well drilling.
- Design of pump house.
- Installation of Booster Pump sets and control panels.
- Chlorine dosing and UV systems.
- Full Water Treatment Solutions.
- Service & Maintenance contracts available.
- Flow Meters & GSM Alarm Systems
- Reservoir Level Control & Radio Systems.
- Scada & Radio Systems.
- Backup Generators.
- Mobile water pumping / treatment stations.

**Campion Mechanical & Electrical Engineering** specialise in providing energy efficient constant pressure pumping systems. This is achieved through the patented "Hydrovar" variable speed pump mounted technology.

**For more information or a demonstration just give us a call.**
